

# Prototype Evaluation: No Single Winner

## Multi-Dimensional Prototype Comparison

Baseline Model  
AI-Enhanced V1  
AI-Enhanced V2

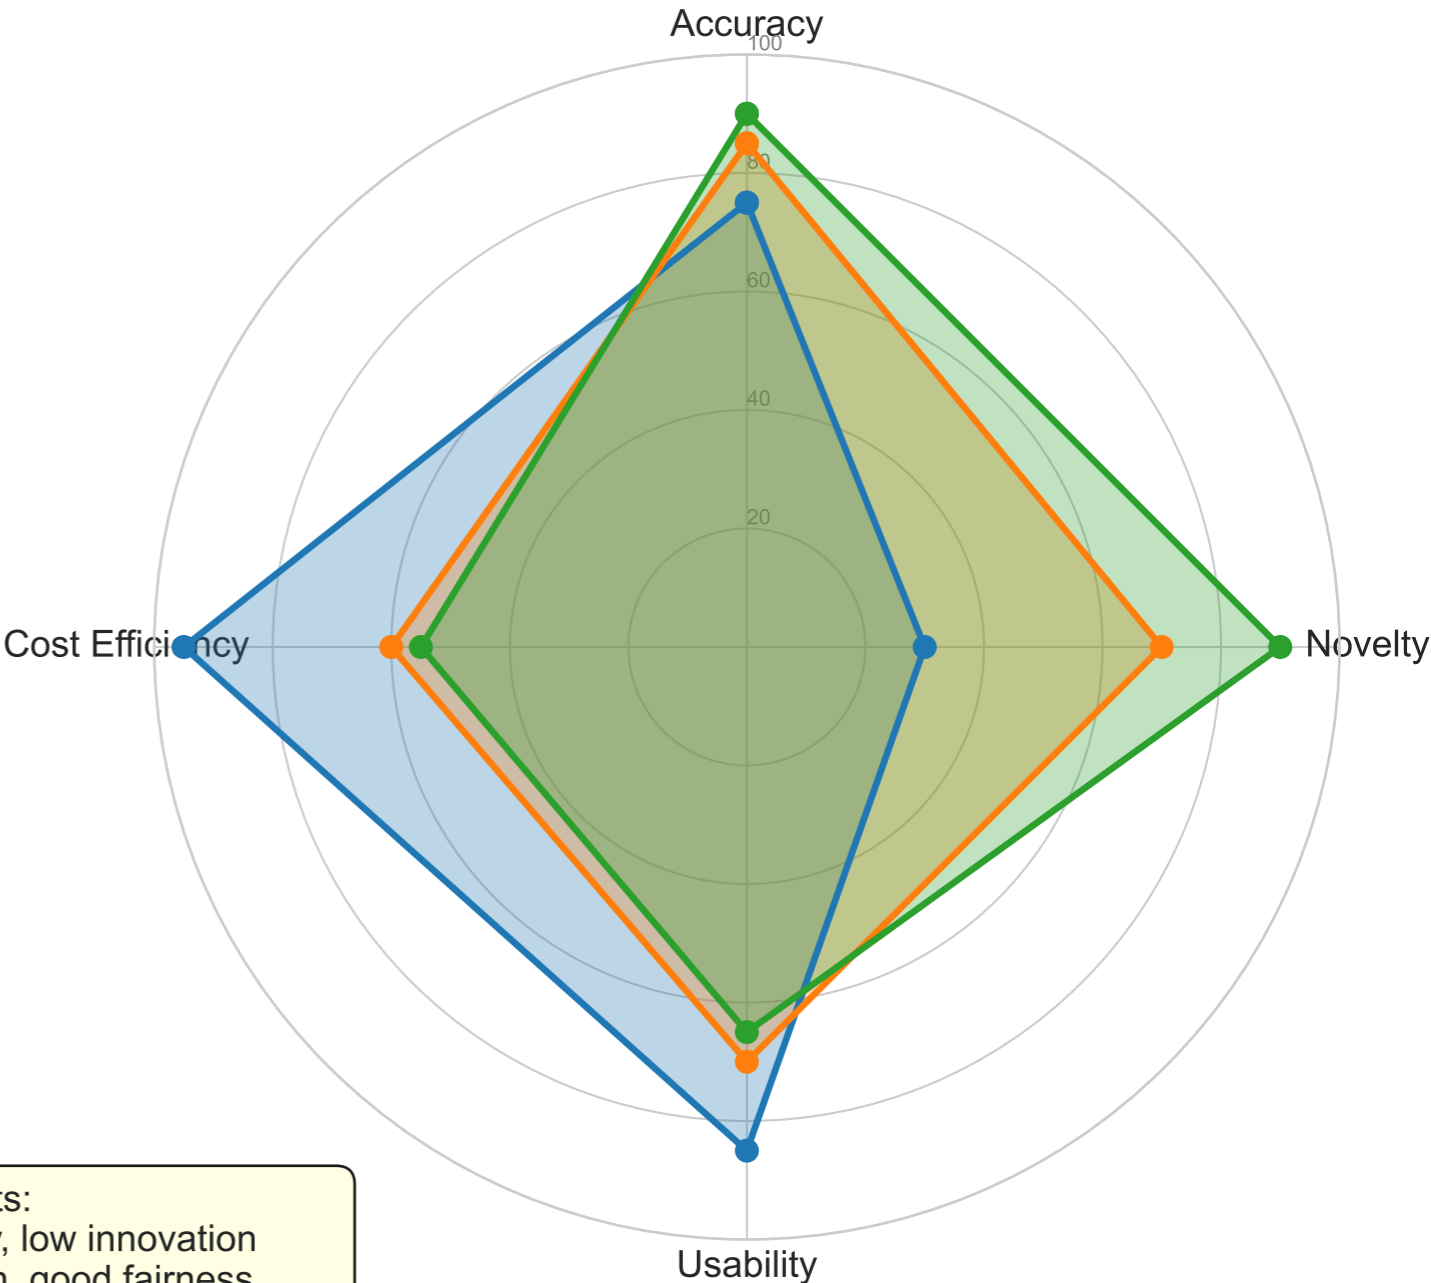

*Higher accuracy often reduces novelty  
More features can hurt usability*

**Key Insights:**

- Baseline: High usability, low innovation
- V1: Balanced approach, good fairness
- V2: Maximum innovation, usability trade-off

**Decision:** Match prototype to user segment needs

## Key Innovation Trade-offs

*Innovation vs. Practicality  
Choose based on user priorities*
