

# Clustering Evaluation Metrics Comparison

## How Different Metrics Behave on Various Data Patterns

### Well-Separated Clusters

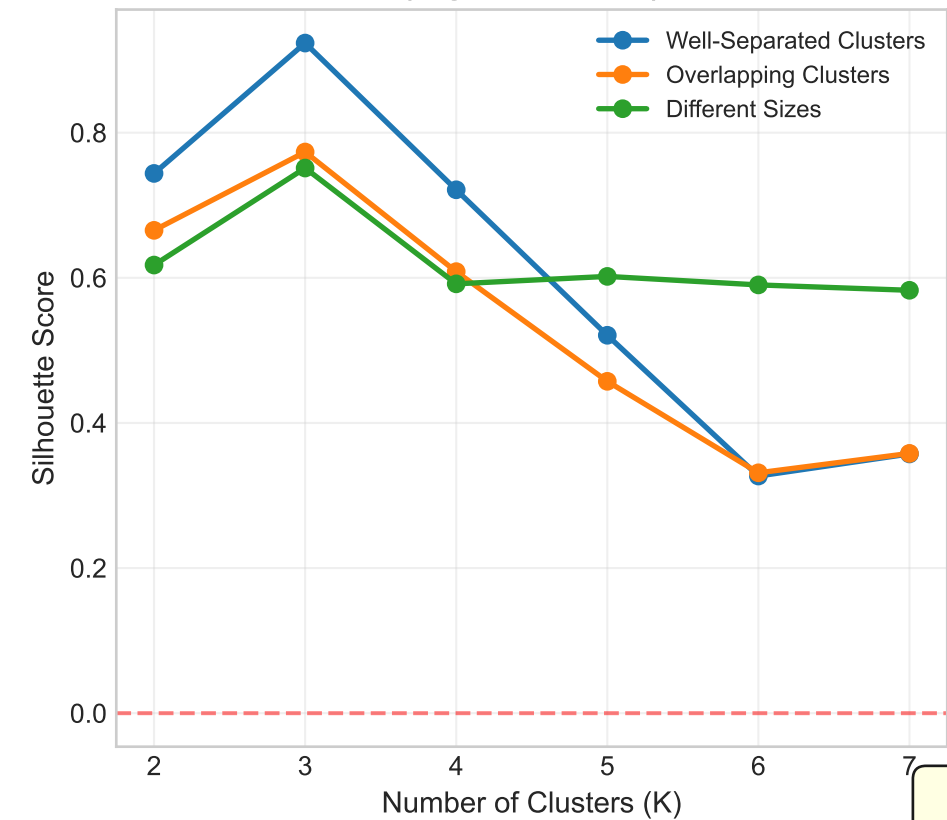

### Overlapping Clusters

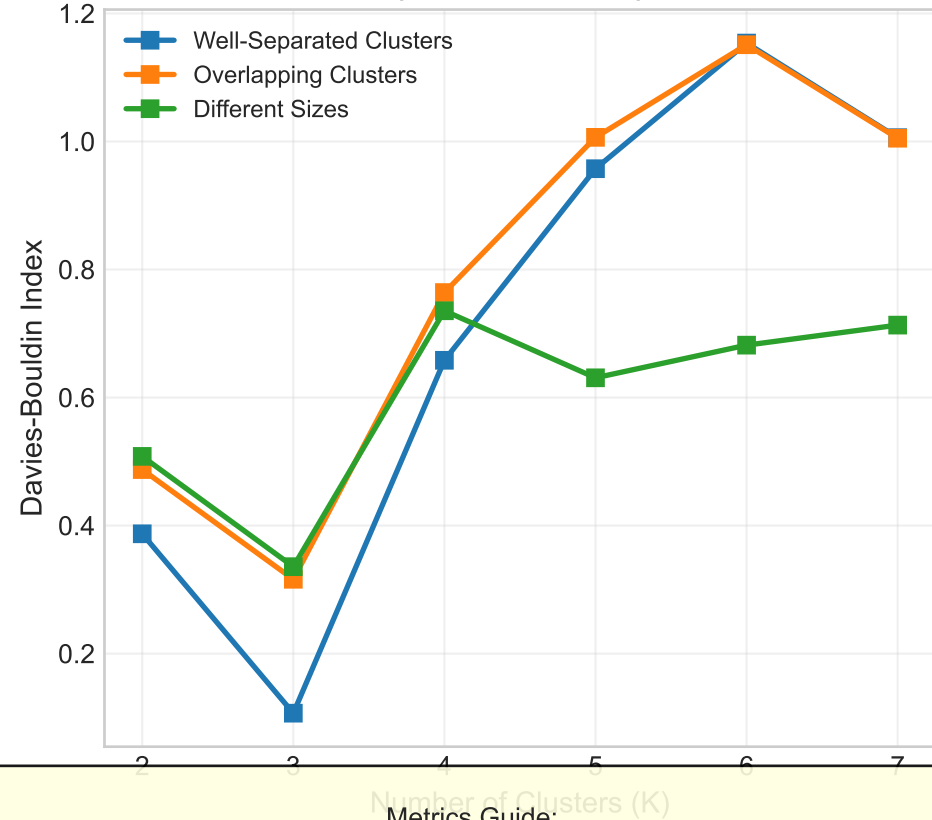

### Different Sizes

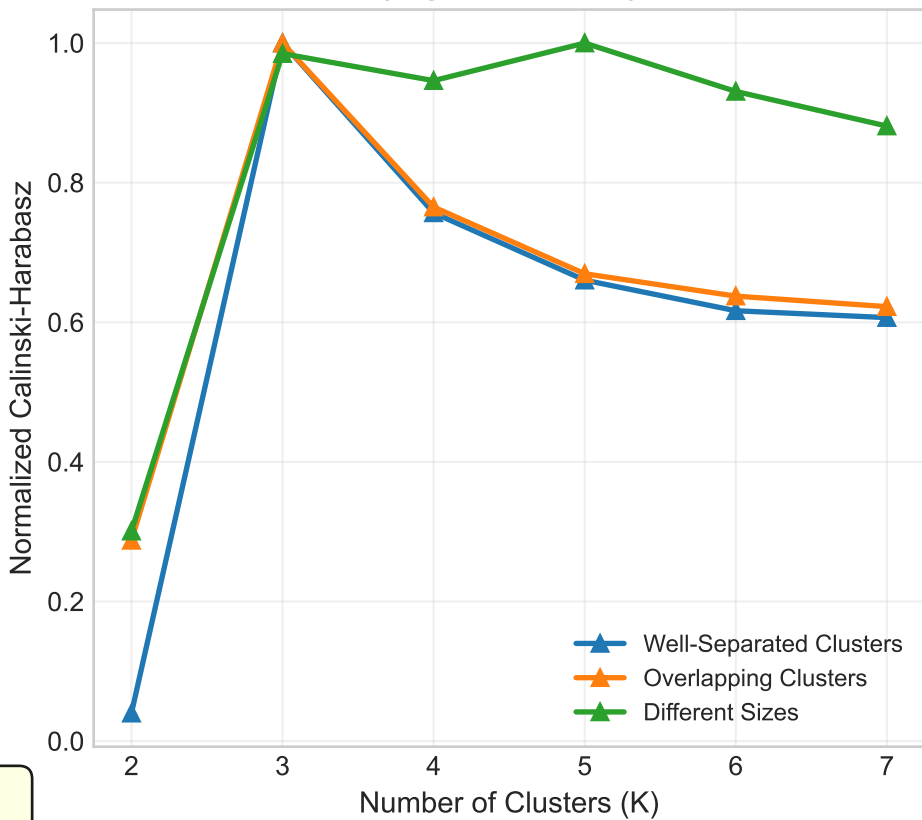

### Silhouette Score (Higher is Better)

### Davies-Bouldin Index (Lower is Better)

### Calinski-Harabasz Index (Higher is Better)

Metrics Guide:

- Silhouette: Measures separation between clusters (-1 to 1, higher better)
- Davies-Bouldin: Ratio of within-cluster to between-cluster distance (lower better)
- Calinski-Harabasz: Ratio of between-cluster to within-cluster variance (higher better)
